

Divine Renewable Energy will be presenting Wednesday evening (Feb. 2, 2011) at 7pm on renewable energy resources and energy efficiency. We will concentrate on solar PV systems and the importance of reducing your overall energy usage.

Come meet the owners of the company. We aim to answer all of your burning questions on solar PV, hydropower, solar thermal (solar hot water), and all other renewable energy systems for home, leisure, and business use.

On Wednesday, Divine Renewable will talk about tapping into your potential renewable energy resources as well as the why and hows of reducing your overall energy load. Join the growing community generating renewable energy from sun, water, air and other non-polluting sources. Come learn about current incentives (renewable energy tax credits, NYSERDA Grants) for solar electric (solar PV). We will also answer your burning questions on solar PV, hydropower, solar thermal, and all other renewable energy systems for home, leisure, and business use. We look forward to meeting you at [Green Planet Grocery](#) !
