

Join Divine Renewable Energy this week in Saratoga Springs as we present renewable energy workshops at the [NOFA-NY annual winter conference](#) . The 28th annual Conference will be held on Friday January 21st through Sunday January 23rd at the Saratoga Hilton in downtown Saratoga Springs.

On Friday Divine Renewable will talk about diversifying your energy supply. This workshop will provide guidance to ensure you understand the basics of obtaining the most cost-effective diversification of energy based on your needs. Renewable energy is an investment, and just like any other investment diversification is key. Renewable energy diversification will take into consideration solar electric (PV), solar thermal (solar hot water), small wind and micro-hydro components. Come and learn the considerations you should include so as not to put all your eggs in one energy basket. On Sunday Divine Renewable will be presenting on Simple Solar Hot Water Heaters. This workshop will provide a basic understanding of how the systems work, the best applications for solar hot water as well as the incentives (renewable energy tax credits, NYSEERDA Grants, USDA Grants) for solar hot water heaters.
